General Specifications

Delivery of creative assets

- Creative assets shall be delivered at least 3 working days before the campaign launch
- click URL
- Tracking elements (pixels or scripts depending on the adFormat).

Point of focus

- 3rd party tags shall be JavaScript, IFRAME type is not accepted.
- All creative including sound must be muted by default, and may only be activated by user click on the « ON / OFF » button (no rollover).
- Our adserver is SmartAdserver; the cache buster macro is [timestamp], and the clickTracking macro is [countgo].
- Please avoid the usage of JavaScript functions named « Mouse.hide() » or « hitTest() » within creative codes.
- Creatives shall not contain any stroboscopic effects.

HTML5 General Guidelines

The creative must be fully compliant with the W3C HTML5 standard (<http://www.w3.org/TR/html5/>) and the here bellow recommendations:

- The root .html file shall be named « index.html »
- This .html file must contain at least the <html> and <body> tags.
- The <body> must be non-transparent (please define a background color or image).
- Supported image types are: GIF, JPG, PNG

Packaging and weight of creatives

HTML5 creatives may be served with agency redirect, or by providing us the asset following as bellow:

- All creative assets (images, codes, libraries, etc.) shall be submitted in a single .zip file.
- There shall be only one .html file at the root of the .zip file.
- Usage of folders within the .zip file is recommended.
- the ad (an .html file) must be viewable without a network connection.
- File weight is measured after all code and assets are stored to a .zip file.
- For file weight limits, see individual format pages for additional information.

ClickTags

Click variables or URL must be included in the root .html file to ease the insertion of the adserver click tracking:

- To ease the locating click variables or URL shall be placed, if possible, right after the <body> tag.
- Anchor links must always have the attribute « target=_blank » to ensure the click destination is opened in a new page or a tab.
- For creatives with multiple click through, please ensure they are grouped within the code or well labelled with a comment.

Browser support and fallback experience

All modern browsers support HTML5:

- Chrome 40 and above versions.
- Firefox 35 and above versions.
- Internet Explorer 10 and above versions.
- Opera 20 and above versions.
- Safari 7.0 and above versions.

Nevertheless, browser may render differently the creative due to the code interpretation. For browsers that do not fully support HTML5, it is important to ensure something is rendered (ie. an alternative image for browser not supporting HTML5 or does not support client side scripting).

Code and asset compressions

Unlike Flash, HTML5 does not atomically optimize code or medias, several methods exist for compressing and optimizing HTML5 creatives:

- Limit the number of files to be loaded as to lower the overall sizes of the creative, also if many files are needed to render the creative this will increase the user perceived latency.

Super Leaderboard 970x90

Deliverables

3rd Party adserving JavaScript tags or files if the creative is hosted by Deezer.

- File type: HTML5, .GIF, .JPG
- Dimensions: 970x90.
- Max File Size: 75 Ko

HTML5

- Please refer to the HTML5 general specifications (page 4).

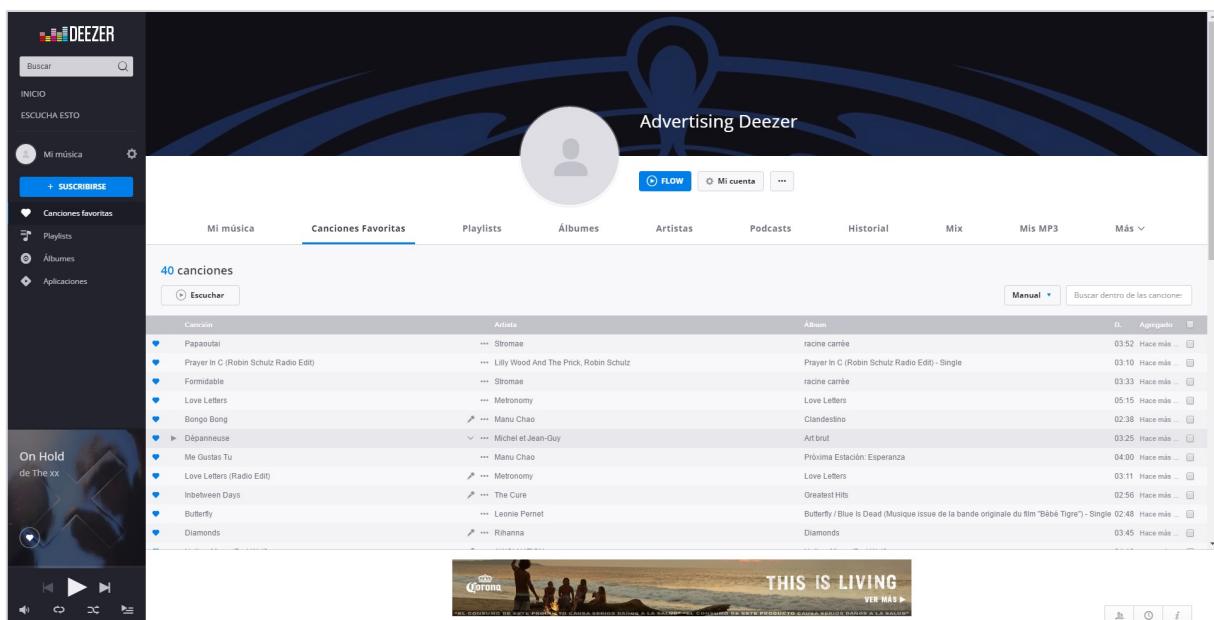

3rd Party tracking

- Click tracking: tracked URL or Click-Command
- Ad Impression tracking: Pixel tracker or JavaScript tracker accepted.

Point of focus

- none.

Example

Billboard 970x250

Deliverables

3rd Party adserving JavaScript tags or files if the creative is hosted by Deezer.

- File type: HTML5, .GIF, .JPG
- Dimensions: 970x250.
- Max File Size: 200 Ko

HTML5

- Please refer to the HTML5 general specifications (page 4).

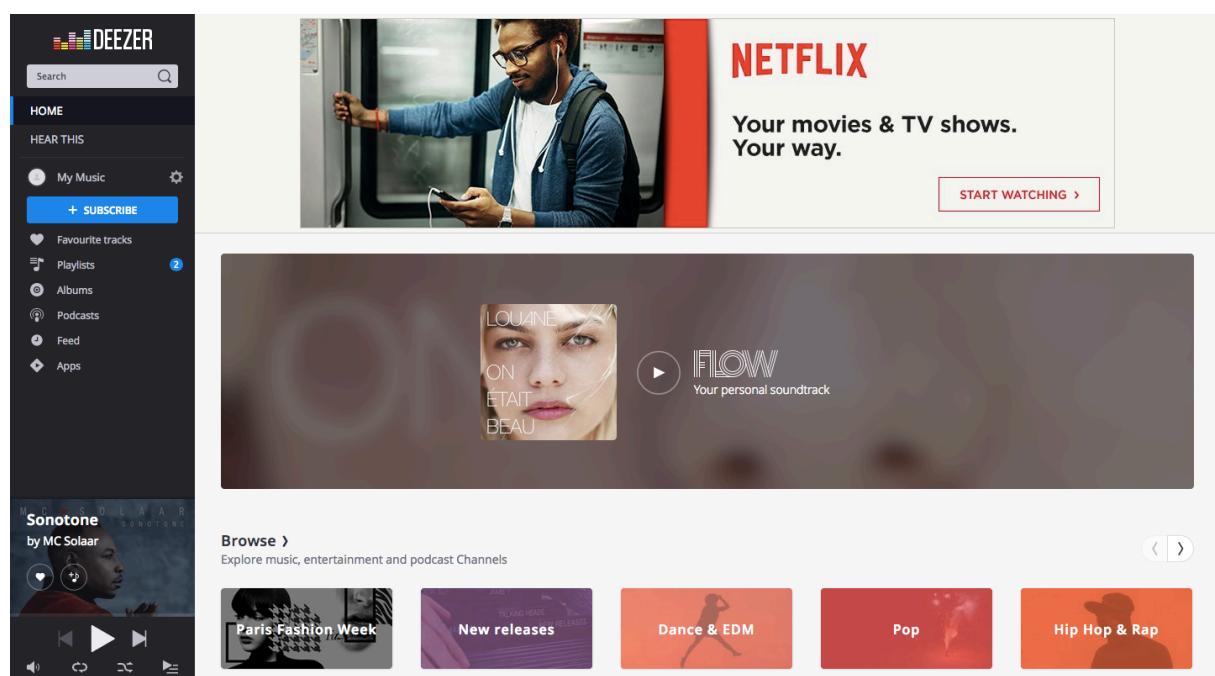

3rd Party tracking

- Click tracking: tracked URL or Click-Command
- Ad Impression tracking: Pixel tracker or JavaScript tracker accepted.

Point of focus

- none.

Example

Video Billboard 970x250

Deliverables

3rd Party adserving JavaScript tags or files if the creative is hosted by Deezer.

HTML5

- File type: HTML5 and MP4
- Dimensions: 970x250
- Max File Size: 200 ko (excl. the video)
- Video max file size : .MP4 video file, 2 Mo max, 30 seconds max.

Standalone video, the integration is managed by Deezer

- File type: .MP4
- Dimensions: 970x250
- Max File Sizes : 2 Mo

3rd Party tracking

- Click tracking: tracked URL or Click-Command
- Ad Impression tracking: Pixel tracker or JavaScript tracker accepted.

Point of focus

- If the video sizes are not well adapted in width and height, it may appear truncated or squashed.
- **Sound if off by default**, and may only be activated by user click on the « ON / OFF » button.
- The video may loop, or replayed by user click on the “replay” button.

Example

The screenshot shows the Deezer mobile application interface. On the left, there's a sidebar with navigation links like 'RECHERCHER', 'ACCUEIL', 'PARCOURIR', 'À ÉCOUTER', 'Ma musique', and a 'S'ABONNER' button. The main content area has a dark header with the McDonald's logo and a video player. The video shows a smartphone displaying a video call interface with the word 'Appel'. To the right of the video, text reads: 'McDonald's propose le service à table, pour se retrouver ensemble à table.' Below the video, a small note says 'Pour votre santé, évitez de grignoter entre les repas. www.mangerbouger.fr'. At the bottom, there's a 'Historique d'écoute' section with a table of listened-to tracks:

#	TITRE	ARTISTE	ALBUM	D.
1	Dream State	Son Lux	Brighter Wounds	05:02
2	Dream State	Son Lux	Brighter Wounds	05:02
3	Dream State	Son Lux	Brighter Wounds	05:02
4	Easy	Son Lux	Lanterns	04:00
5	Easy	Son Lux	Lanterns	04:00
6	Easy	Son Lux	Lanterns	04:00

Audio adBreak

Deliverables

3rd Party adserving JavaScript tags or files if the creative is hosted by Deezer.

Display

- File type: HTML5, .GIF, .JPG
- Dimensions: 728x90
- Max File Size: 75 Ko
- For more details, please refer to the « Leaderboard» specifications on page 7.

Audio file

- File type: MP3 only (128 CBR), or VAST Audio tag.
- Gain: 89db max.
- Duration: 30 seconds max.
- Max File Size: 1 Mo

Baseline associated to the Audio spot

If wished we may add an optional 36 character max text within the player (i.e. advertiser – product name).

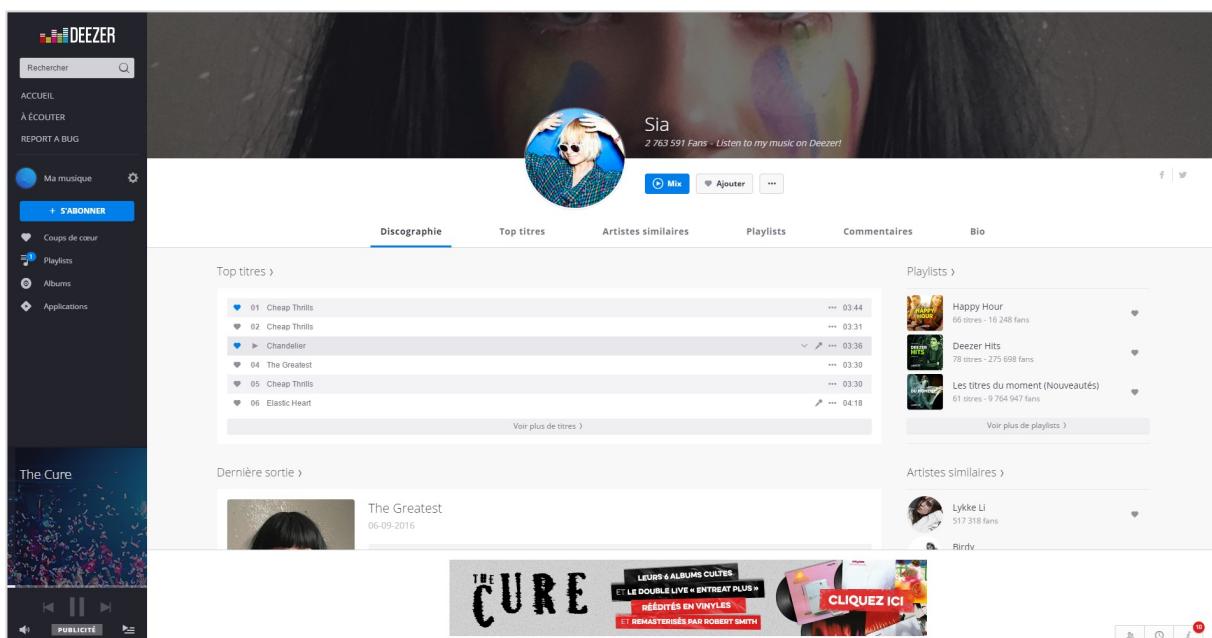

3rd Party tracking

- Click tracking: tracked URL or Click-Command
- Ad Impression tracking: Pixel tracker or JavaScript tracker accepted.

Point of focus

- if specified in the insertion order, a 970x90 banner can be synchronously served with the audio spot, in replacement of the 728x90 banner

Example

Video adBreak

Deliverables

3rd Party adserving VAST tag or files if the creative is hosted by Deezer.

Redirect VAST / VPAID

Responding to VAST 3.0 or VPAID 2.0 standards, including:

- One video file: .MP4, .FLV
- Dimensions: 1024x576 (16/9 ratio)
- Framerate: 25 fps
- Duration: 30 second max

If the video is hosted by Deezer:

- File type: .MP4 only.
- Dimensions: 1024x576 (16/9 ratio)
- Max File Size: 4 MB
- Framerate: 25 fps
- Duration: 30 second max

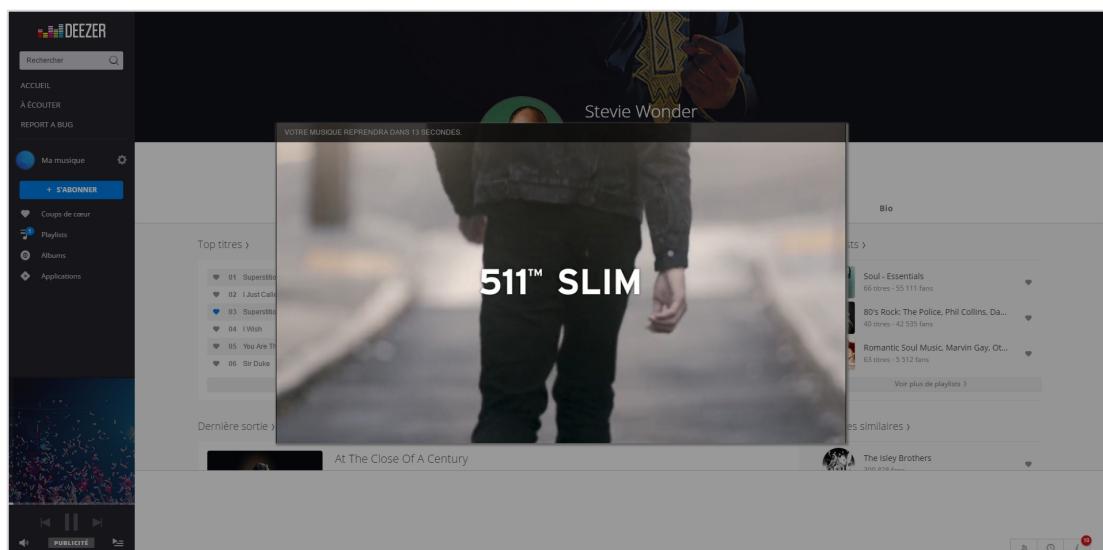

3rd Party tracking

- Click tracking: tracked URL or Click-Command
- Ad Impression tracking: Pixel tracker only.

Point of focus

- VPAID creatives shall not include a close button as it is managed on our adserver side.

Example

Takeover

Deliverables

3rd party JavaScript tags or files if the creative is hosted by Deezer.

The Takeover is constituted of 2 assets:

- The header
- The right gutter.

Header

- With the exception of the sizes please refer to the « Header 750x120 » specifications on page 7.

Dimensions:

- Home page: 770x120 or 770x200 if specified in the insertion order.

Right gutter

- File type: .JPG, .PNG
- Dimensions: 500x1200
- Max File Size: 100 Ko

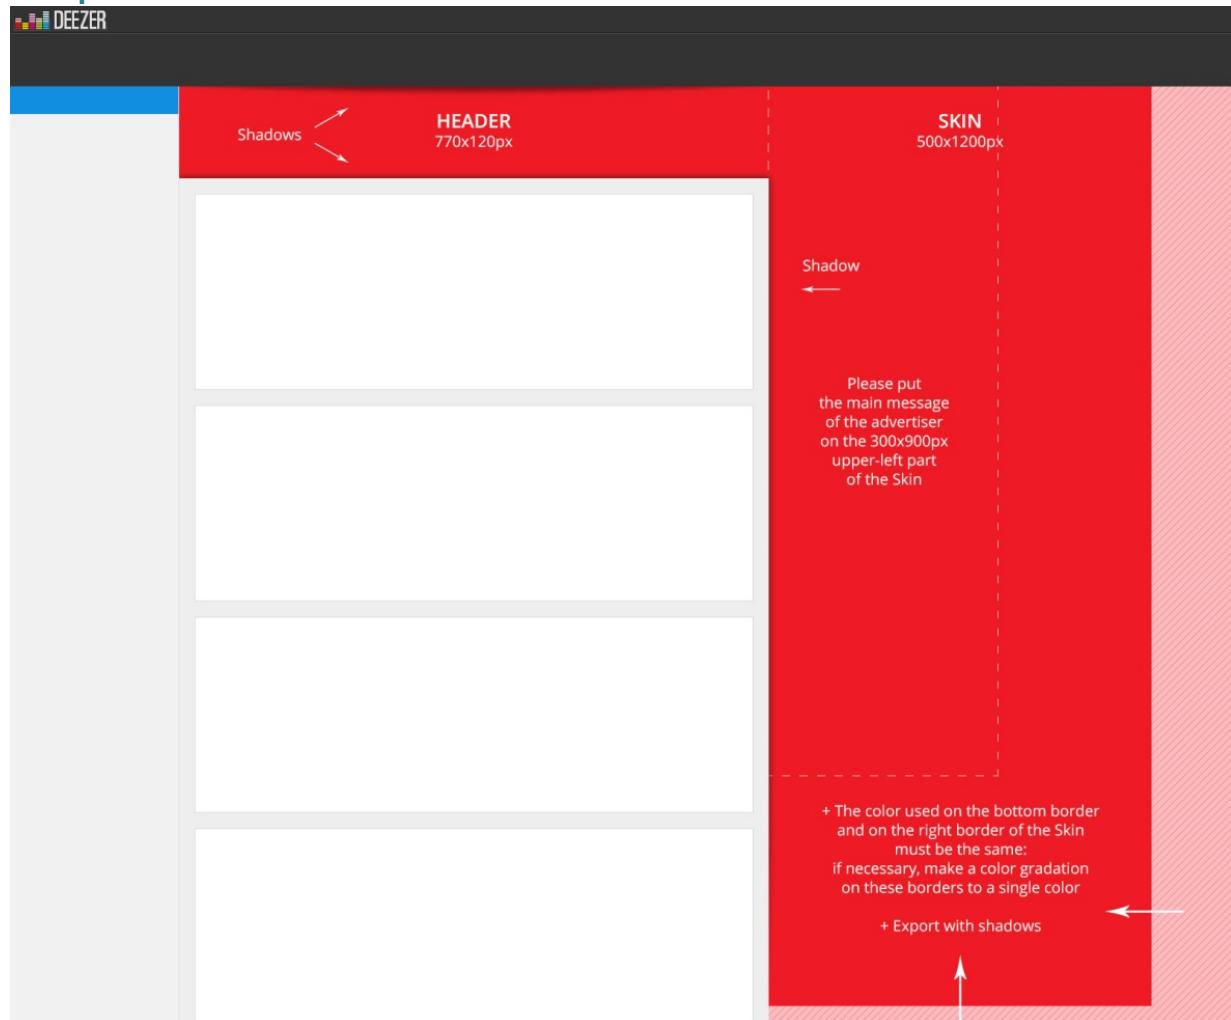

3rd Party tracking

- Click tracking: tracked URL or Click-Command
- Ad Impression tracking: Pixel tracker only.

Point of focus

- The header may be animated rather than keeping it static.
- On small screens the right area of the 500x1200 element may be masked. It is recommended to concentrate main messages and elements in the top left 300x900 safe zone.
- If the Takeover includes richmedia elements, sound shall be muted by default, and may only be activated by user click on the “on/off” button.
- The color of the right and left borders of the right gutter shall have the same plain color than the chosen one for the background of the body of the page. A gradient effect can be used to this purpose if needed.

Template – Takeover

Example

Custom Formats

Deliverables

- 3rd Party JavaScript Tags only.

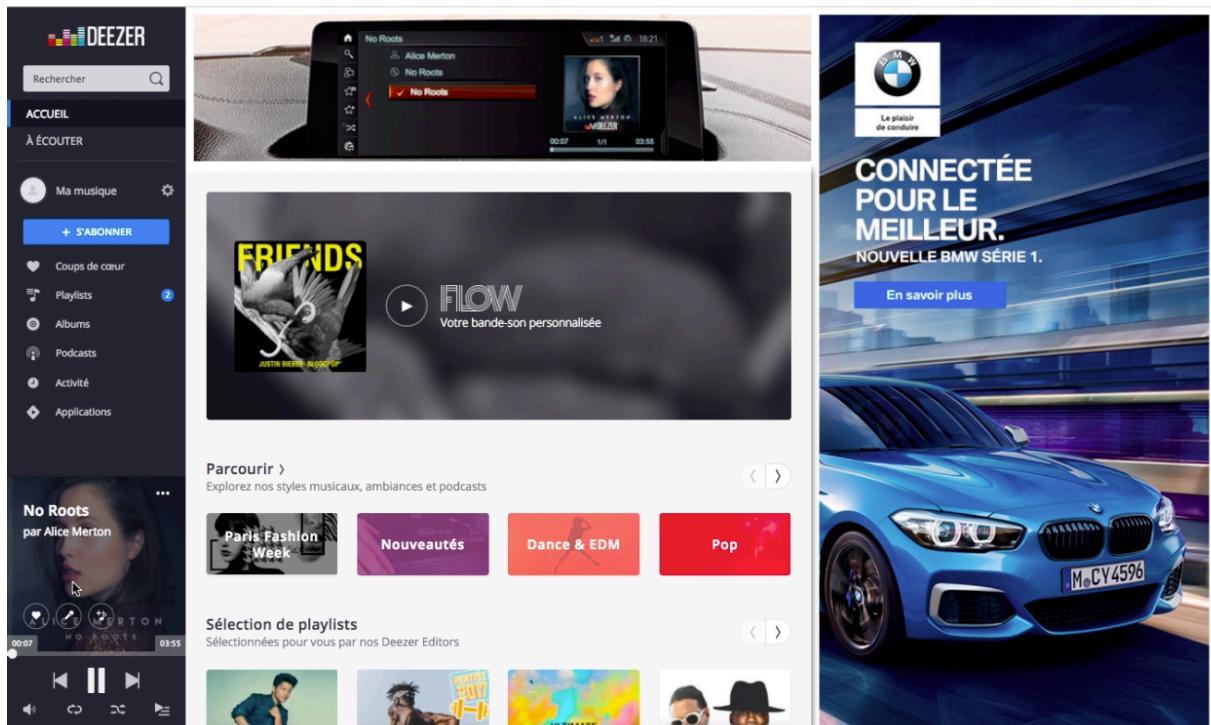

3rd Party tracking

- Click tracking: tracked URL or Click-Command
- Ad Impression tracking: Pixel tracker only.

Point of focus

- Deezer allows you to make Special « Custom » Features. You just have to brief us at least 2 weeks before it is planned to go live.
- As each custom format is "unique", there are no specific Technical Specifications: They will be set by the Traffic Team after the initial briefing.
- All creative including sound must be muted by default, and may only be activated by user click on the « ON / OFF » button (no rollover).

Exemple :

Interactive takeover synchronised with the Deezer content player
